248 - Beige

### Virtually Unlimited

**COLOR** Options

For projects requiring custom color schemes, PIP is able to match virtually any RAL color. We can also match to physical samples, or other color swatch cards. For more information, contact your PIP Business Development Representative or call us at 1-800-974-1323.

*\* Because of the nature of digital printing, the above color samples are close approximations of actual colors and should not be relied upon for true color matching purposes. For product and color samples, contact Protective Industrial Polymers at 1-800-974-1323.*

*\* Please note that ESD product colors may vary slightly due to the pigmented conductive fillers used in the ESD product. For ESD color options, please contact your Protective Industrial Polymers representative at 800-974-1323.*

*\* Colored pigment can be incorporated into any Protective Industrial Polymers flooring system (CT-Series, BC-Series, SL-Series, MT-Series)*
