

KitchenSpec RC-PM Rapid-Curing, Polymer-Modified Mortar Flooring System

System Description:

A high-performance, rapid-curing, polymer-modified mortar system broadcast with quartz aggregate and top-coated with a rapid-curing, chemical-resistant polyaspartic. This system is formulated for use in kitchen or food preparation areas requiring a finish that is easy to clean, resistant to thermal cycling, chemicals and kitchen oils and grease. This system features same day turnaround for kitchen projects requiring minimal downtime.

System Advantages:

- Very low odor
- Fast-turnaround
- Resistant to hot grease, will not soften due to boiling water
- Seamless
- High compressive strengths
- Easily repaired
- Stands up to solvent-based cleaners
- Very good adhesion to damp concrete
- Does not "white out" with traffic
- Chip-resistant
- Color and UV stable
- Wide range of gloss options

System Installation Overview:

1. Apply Protect UC-Series mortar broadcast with quartz aggregate and allow to cure
2. Apply Protect 4100 RC or Protect 4300 PA polyaspartic topcoat and allow to cure
